EXPERIENCE

Tsole Technologies

AI Engineer Intern

Apr 2026 – Jun 2026

Remote

- Developed 12+ production REST API endpoints using FastAPI, Python, and PostgreSQL with JWT authentication, supporting 1,500+ daily active user requests with 99.8% uptime.
- Built multi-agent LangGraph and LangChain workflows with Mistral AI and Groq LLMs, cutting conversational decision latency by 42% across multi-step execution tasks.
- Architected high-throughput RAG pipelines with ChromaDB vector search and semantic document chunking, achieving 94% retrieval accuracy across unstructured document sets.
- Optimized PostgreSQL schema queries and database migrations via Alembic and SQLAlchemy, reducing query execution time by 30% across integration test suites.

PROJECTS

ApplyAI – Job Application AI Agent | Next.js, FastAPI, LangGraph, LangChain, Playwright, ChromaDB Jan 2026 – Present

- Architected an autonomous agent pipeline with FastAPI and LangGraph, reducing manual job application parsing time by 80% across 500+ benchmarked postings.
- Engineered a ChromaDB vector RAG matching module that analyzes resume skills against job descriptions with a 92% accuracy score.
- Integrated Mistral AI models to generate tailored ATS resumes and cover letters in under 4 seconds per application; deployed pipeline on Vercel and Render.

Spott – Event Discovery & Booking Platform | Next.js, React, Node.js, Convex

Nov 2025 – Dec 2025

- Constructed a real-time event booking system using Next.js and Convex backend, maintaining sub-100ms sync state for 200+ concurrent users.
- Designed event booking endpoints with optimistic UI state updates to prevent double-booking race conditions, reducing API response latency by 35%.
- Developed user state management components and multi-attribute search filters with Tailwind CSS, increasing user onboarding conversion by 25%.

ZenFlow – Productivity Tracker & Chrome Extension | Next.js, Firebase, Chrome Extension, Vercel Aug 2025 – Sep 2025

- Built a full-stack productivity suite featuring a Next.js web app linked to a Manifest V3 Chrome Extension via background workers, reaching 100+ active sessions.
- Implemented streak tracking analytics using Firebase Firestore listeners, handling 1,000+ daily telemetry events for live focus session tracking.
- Integrated cross-platform Firebase Authentication, maintaining state sync across extension popups and web dashboards with zero data desynchronization.
